(213) 675-1269 | hthakur@usc.edu | [linkedin.com/in/hrishikesh-thakur](https://www.linkedin.com/in/hrishikesh-thakur) | hrishikeshthakur.com | Sunnyvale, CA

Software Engineer with 2+ years of experience designing scalable backend systems, building full-stack applications, and CI/CD automation. Proven track record of delivering production-ready solutions in agile, cross-functional environments.

EDUCATION

University Of Southern California

August 2023 - May 2025

Master of Science in Computer Science

GPA : 3.48 / 4.00

- **Relevant Coursework:** Web Technologies, Analysis Of Algorithm, Database Systems, Information Retrieval, NLP, ML

SRM Institute Of Science And Technology

June 2018 - May 2022

Bachelor of Technology in Computer Science Engineering

GPA : 3.80 / 4.00

- **Relevant Coursework:** Object Oriented Programming, Operating Systems, Computer Networks, Distributed Operating Systems

SKILLS

Languages: Python, Java, C++, C, JavaScript, TypeScript, Swift, SQL, Bash/Shell

Project Management: Agile, Scrum, Jira, Confluence, Slack

DevOps/Cloud: Git, GitHub, GitLab, Docker, Kubernetes, Nginx, AWS (EC2, S3, Lambda, RDS), GCP (Firestore, App Engine), CI/CD (Jenkins, GitHub Actions)

Databases: PostgreSQL, MySQL, MongoDB, Redis, SQLite, DynamoDB, Elasticsearch

Testing: JUnit, pytest, unittest, Selenium, Cucumber, WebDriverIO, TDD, BDD, Postman

Frameworks/Libraries: Spring Boot, Node.js, Flask, Django, GraphQL, REST APIs, React.js, Redux, Tailwind CSS, OAuth2, JWT

EXPERIENCE

Associate Software Engineer

July 2022 - July 2023

Highradius

- Scaled backend services in **Java, Spring Boot** for anomaly detection, enhancing reconciliation across 15+ enterprise clients.
- Built tenant-specific **React** components, reducing UI duplication by 40% and accelerating feature rollout across multiple client.
- Modularized backend logic to enable cross-module reuse, cutting development time for recurring features by 25%.
- Collaborated with QA & product teams to define requirements for 100+ features, ensuring timely delivery under tight deadlines.
- Engineered a reusable **WebDriverIO** test framework, increasing bug detection speed by 50% and reducing manual QA effort.
- Spearheaded automation of 100+ UI test cases with a team of 5 interns, cutting down total test creation time by 60%.
- Integrated tests into a **Jenkins CI/CD** pipeline, facilitating pre-merge regression checks and decreasing release bugs by 35%.

Software Engineer Intern

August 2021 - June 2022

Highradius

- Engineered a Spring Boot Data Catalog for centralized access, collaborating with cross-functional teams and decreasing manual data transfer time by 30% via scalable ingestion pipelines..
- Standardized data ingestion protocols from legacy ERP systems using a cloud-based solution, catalyzing seamless batch processing of 500+ million records and improving data governance.

Software Developer Intern

April 2021 - June 2021

Atmas Softwares Private Limited

- Developed real-time notifications with Server-Sent Events and offline support via Redux Offline, enhancing app reliability.
- Optimized scalability by 28% with **Nginx** load balancing, enabling more concurrent users with stable performance.

PROJECTS

Transcribe AI – Real-Time Audio Transcription Chrome Extension([Link](#))

May 2025 - August 2025

- Chrome extension with **React** and **TypeScript** to capture tab audio and provide real-time transcription via Google Cloud Speech-to-Text, enhancing accessibility.
- Designed a responsive sidepanel UI with WebSocket streaming and export options, enabling efficient note-taking and sharing.

Weather Search Web Application([Link](#))

September 2024 - December 2024

- Responsive fullstack app with React + Node.js, integrating Tomorrow.io and Google Places APIs for live weather and geolocation
- Leveraged MongoDB and GCP for scalable storage and deployment, enabling multi-device support and robust error handling.

Regularization Techniques on Image Classification([Link](#))

February 2024 - May 2024

- Evaluated **L2 Regularization**, **Dropout**, and **Data Augmentation** on custom **CNNs**, diminishing validation loss by **20%**.
- Built an ensemble method with Dropout, L2, and five augmentations, doubling dataset size and boosting generalization.

Differentiable Symbolic Reasoning on language Model([Link](#))

February 2024 - May 2024

- Fine-tuned the **DSR-LM** framework with custom classifiers, boosting kinship classification accuracy by **75%** on CLUTRR dataset.
- Benchmarked DSR-LM's generalization ability, showcasing logical reasoning efficiency with limited training data.
